

## CALCULATOR PROGRAMS ASSIGNMENT

```
"""This program will accept two numbers, carry out addition, subtraction, multiplication, division and modulus."""
```

```
#store numbers
```

```
firstNumber = 20
```

```
secondNumber = 30
```

```
#add numbers
```

```
sum = firstNumber + secondNumber
```

```
print(sum)
```

```
#subtract numbers
```

```
subtraction = firstNumber - secondNumber
```

```
print(subtraction)
```

```
#multiply numbers
```

```
multiplication = firstNumber * secondNumber
```

```
print(multiplication)
```

```
#divide numbers
```

```
division = firstNumber / secondNumber
```

```
print(division)
```

```
#modulus
```

```
modulus = firstNumber % secondNumber
```

```
print("the remainder is result",modulus)
```
